New Opel Zafira Life – Prices and versions

Perfect Choice: New Opel Zafira Life

- Full of features: Top comfort, technologies and safety as standard
- Variability times three: Zafira Life in three lengths with space for up to nine people
- Ready for anything: Wide equipment range from convenient to comfortable
- State-of-the-art: Features such as sensor-controlled sliding doors on offer

Rüsselsheim. The new Opel Zafira Life made its world premiere at the Brussels Motor Show in January and is now available to order from €34,660 (all prices RRP incl. VAT in Germany). The flexible multi-purpose passenger car is available as the Zafira Life Selection with space for five passengers, top comfort and many practical features. The Euro 6d-TEMP-certified, 75 kW/102 hp 1.5-litre turbo diesel engine drives the front wheels (fuel consumption according to NEDC¹: urban 5.4-5.3 l/100 km, extra-urban 4.9-4.7 l/100 km, combined 5.1-4.9 l/100 km, 134-129 g/km CO₂; fuel consumption according to WLTP²: combined 7.2-6.1 l/100 km, 189-159 g/km CO₂).

“The Opel Zafira Life is a multi-purpose passenger car tailor-made to customer requirements,” says Managing Director Sales, Aftersales and Marketing, Xavier Duchemin. “Available in three lengths, it covers three vehicle segments and makes it easy for customers to find the perfect model. In addition, innovative technologies ranging from adaptive IntelliGrip traction control to camera and radar-based assistance systems, and features such as sensor-controlled sliding doors can also now be ordered.”

Practical benefits, comfort and safety are top priorities

¹ WLTP measurements converted to NEDC values for comparison

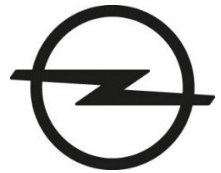

² WLTP combined figures (for information only, not to be confused with official NEDC values)

The new Zafira Life is available as the 4.60-metre-long “Small”, the 4.95m “Medium” and the 5.30m “Large” version. The multi-adjustable driver and passenger comfort seats in the **Zafira Life Selection** “Medium” entry-level version (€34,660) – which is especially interesting for business customers – ensure a relaxed driving experience. This is further enhanced by safety and assistance systems such as Hill Start Assist, Cruise Control and Speed Limiter as well as traction control with engine and brake intervention. The bench seat in the second row can be folded down and removed. The Zafira Life Selection can be configured with up to nine seats as an option. The desired temperature can be adjusted via a climate control system; in the rear the darkly tinted Solar Protect heat-absorbing glazing also helps maintain a comfortable temperature. Laptops and other electronic devices can be connected in all three rows of seats via a 12-volt socket.

The **Zafira Life Tourer** top-of-the-line business model variant, which can be ordered from €44,600 also in “M”-size, offers as standard additional technologies and assistance systems such as Head Up display, an individually programmable Cruise Control and Speed Limiter as well as the Apple CarPlay and Android Auto compatible infotainment system “Multimedia Radio”. The sound system features ten premium loudspeakers, amplifier and subwoofer, ensuring finest sound for first-class listening pleasure. The leather comfort seats for the driver and front passenger include massage function and heating. On warm days, a two-zone automatic climate control at the front and an additional air conditioner for the other passengers, keeps everyone cool. The roof liner with three reading lamps and ambient lighting enhances the pleasant atmosphere in the rear. The sensor-controlled electric sliding door facilitates access to the second and third seat rows, which each consist of two individual leather seats: a simple movement of the foot below the vehicle side is all it takes to gain easy entry. The leather rear seats are conveniently attached to rails and can be folded and removed when necessary.

The entry-level engine of this version is the 110kW (150hp) 2.0-litre turbo-diesel (NEDC¹ fuel consumption: urban 6.5-6.1 l/100 km, extra-urban 5.3-5.0 l/100 km, combined 5.8-5.4 l/100 km, 152-142 g/km CO₂; WLTP² fuel consumption: combined 8.0-6.8 l/100 km, 210-177 g/km CO₂). Externally, the Zafira Life Tourer visually impresses with bi-xenon headlights including LED daylight driving lamps and Bi-Color 17-inch light alloy wheels.

The Edition and INNOVATION equipment lines of the Zafira Life are aimed at families and private customers. The **Edition** (from €38,310) features comfort seats for the driver and front passenger, assistance systems such as Cruise Control and Speed Limiter, as well as Hill-Start Assist. Also on-board are energy-saving LED daylight driving lamps, dual-zone automatic climate control and additional air conditioning in the rear.

The **Zafira Life INNOVATION** (from €47,650) stands out thanks to bi-xenon headlights including LED daylight driving lamps and 17-inch light-alloy wheels. The exterior mirrors are electrically adjustable and heated. The “Multimedia Radio” infotainment system has 10 loudspeakers for excellent audio. Thanks to the panorama glass sunroof, passengers feel as if they are in a lounge on wheels. The sensation is enhanced by leather comfort seats with massage function and heating for driver and front passenger. The second-row bench-seat can be moved forward and backward easily on rails, and folded 1/3:2/3.

The new Zafira Life can be configured with space for up to nine people regardless of the vehicle length. Opel also offers equipment options in other Zafira Life variants with five, six, seven, eight or nine seats – some in leather trim. The high comfort does not come at the expense of practical everyday use – already with the Zafira Life S, removing the rear seats increases the load capacity to up to 3.6m³, or up to an enormous 4.9m³ in the L-version.

Another major advantage the Zafira Life offers for city driving is that most model variants are just under 1.90m high and can therefore be driven into normal underground or multi-storey car parks without any problems. This is particularly important when it is used as a hotel shuttle, for example, but also for everyone who wants to park their car wherever allowed in heavily frequented urban areas.

About Opel

Opel is one of the largest European car manufacturers and was founded by Adam Opel in Rüsselsheim, Germany, in 1862. The company started building automobiles in 1899. Opel has been part of the [Groupe PSA](#) since August 2017. Together with its British sister brand Vauxhall, the company is represented in more than 60 countries around the globe selling over one million vehicles in 2018. Opel is currently implementing its electrification strategy to secure sustainable success and ensure that the future mobility demands of customers are met. By 2024, all European passenger car models will offer an electric variant. This strategy is part of the company plan [PACE!](#) with which Opel aims to become sustainably profitable, global and electric.
